

# always on call

## PORTABLE ASPIRATING FIRE DETECTION

With Early Warning Air Sampling Systems protecting up to 20,000 sqft. per zone, identifying the source of an impending fire threat is no longer difficult. The ProLocator Portable Aspirating Fire Detector is the industry's first handheld detector which can lead you to an impending fire threat which otherwise cannot be seen.

- Convenient handheld system
- Locate potential fires from early warning alarms
- Use in conjunction with any air sampling system
- Includes sampling probe and battery charger
- Not affected by dirt, dust, temperature or humidity allowing one to probe inside equipment and above drop ceilings
- Does not require any recalibration

## **PRO**Locator™ Fire Sniffer™

## PROLOCATOR "FIRE SNIFFER":

Now you can find the fire with this revolutionary new air sampling detector which can take you to within one foot of an invisible and odorless fire in a 20,000 sqft. room. The ProLocator can be used virtually anywhere; computer rooms, factories, schools, malls, telecom centers, etc., and can be operated by almost anyone. This easy to use detector can also assist fire departments with investigating and verifying possible false alarms, or help locate hot spots after a fire.
